1. Fall-to-Fall retention identifies the number of students who start during the fall term and either complete their program by or continue in their program the following year (example: student starts program in Fall 2021 and continues enrollment in same program during the Fall 2022).
2. Students in parenthesis include individuals who upon admission, initially indicated they were enrolling in the EMS - Associate of Science Degree, but upon completion of their EMS - Paramedic certificate, voluntarily elected not to continue the pursuit of the EMS - Associate of Science Degree. The cohort size column includes all students who indicate they are enrolling in the program, despite later electing not to pursue the degree.
